STEINHART AQUARIUM • NATURAL HISTORY MUSEUM • RESEARCH • EDUCATION

California Academy of Sciences Rebuilding Project Fact Sheet

The California Academy of Sciences is constructing a dynamic new facility in Golden Gate Park. The new Academy will combine innovative green architecture with inventive exhibitions to inspire its visitors to explore and protect the natural world. The new Academy will house Steinhart Aquarium, Morrison Planetarium, and the Kimball Natural History Museum.

Opening Date Late 2008

Groundbreaking Date September 2005

Design Features and Integration into Golden Gate Park

- The new Academy will be integrated more sensitively into the natural environment of Golden Gate Park.
- The facility will employ energy-efficient, environmentally-sensitive building technologies that will set a new standard for sustainable architecture in civic buildings.
- A living planted roof will feature undulating hills that echo the landscape around the Academy. A small portion of the roof will be accessible to visitors and will feature an exhibit area.

Exhibitions and Public Spaces Highlights

- The new Academy will feature flexible, integrated exhibition spaces. Portions of the Academy's research collections will be visible to museum visitors, and special programs will offer visitors the chance to interact with Academy biologists.
- The new Morrison Planetarium will feature state-of-the-art exhibits and digital technology.
- The new Steinhart Aquarium will include a two-story Swamp; the world's deepest living coral reef display; a Discovery Tidepool, and hundreds of "jewel" tanks to showcase the stunning diversity of aquatic life.
- A dramatic four-story Rainforests of the World exhibit will offer a vertical journey through four different rainforest habitats.
- Live animals will be displayed throughout the museum, including penguins in the restored African Hall.
- A new piazza will sit at the heart of the building, and views into Golden Gate Park from within the new facility will strengthen the Academy's relationship to the park.

Enhanced Education Spaces and Services

- A new hands-on Naturalist Center will be staffed by education specialists and will feature labs and classrooms.
- An expanded early childhood education center will cater to children up to age six and their caregivers.
- A new Auditorium will feature flexible set-up options and retractable seating.

Facility Dimensions

Total square footage in new Academy: 410,000 square feet. Total public space: 100,000 square feet. The new Academy will have more useable square footage than the previous facility but will leave a smaller footprint in the park due to the addition of a basement and more efficient use of interior space.

Project Team

Architecture: Renzo Piano Building Workshop (Genoa, Italy); Chong Partners Architecture (San Francisco). Engineering and Sustainability Consulting: Arup. Landscape Architecture: SWA Group. General Contractor: Webcor Builders.

Why we are Eastwood Associates: Lois and Arthur Roth

Lois has many fond memories of visiting the Academy since she was a child and has always loved our exhibits and educational programs — so much so that she has been a docent for almost 20 years!

Lois says, “The friendly, supportive atmosphere makes the Academy an ideal place to learn and teach about the natural world.” Lois and Arthur have also been active Friends members and enjoyed many enriching experiences getting to know the scientists and other Academy supporters at special events and behind-the-scenes programs. As Eastwood Associates, they included the Academy in their estate plans so that future generations can continue to expand their knowledge about the natural world.
